

AnaHit Salt Block

Salt bricks or blocks are used to build salt structures. The rocks of industrial salt are transported to the factory after being extracted from the mines by explosive operations, where they are cut into salt blocks. These blocks have a very high density and also due to the existence of complexes of intermediate elements, they have a high color variety and can be seen in white, pink, crimson, brown, red, green, gray, etc.

Salt Block Modle A20105

Dimensions:

Length	Wide	Thickness	Weight
20 cm	10 cm	5 cm	2.2 kg

Price: 12 USD for 10 qty

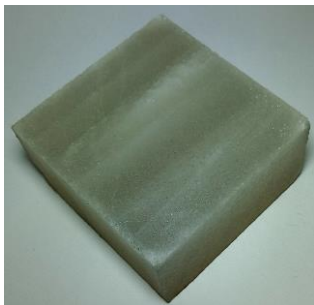

Salt Block Modle A20103

Dimensions:

Length	Wide	Thickness	Weight
20 cm	10 cm	3 cm	1.3 kg

Price: 10 USD for 10 qty

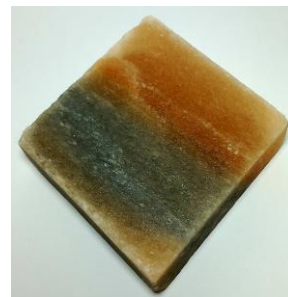

Salt Block Modle B10105

Dimensions:

Length	Wide	Thickness	Weight
10 cm	10 cm	5 cm	1 kg

Price: 8 USD for 10 qty

Salt Block Modle B10103

Dimensions:

Length	Wide	Thickness	Weight
10 cm	10 cm	3 cm	0.55 kg

Price: 6 USD for 10 qty
